

## MSAB receives significant Q3 order from the French Gendarmerie Nationale

As a result of MSAB's market presence and continued development of state of the art mobile forensic solutions, the company has received an order of approximately 12 MSEK from the French Gendarmerie Nationale with delivery scheduled in the third quarter. The order is for the MSAB extraction solution, XRY, for frontline usage. The solution is user-friendly and designed for quick and easy extraction of information from digital devices, without requiring special expertise.

"We have a strong position in Europe already but we still see many opportunities for additional growth. MSABs biggest customer group from a revenue perspective is police authorities. The French Gendarmerie Nationale is a great example where our forensic solutions are expanding to another type of customer. This confirms our strong belief that we have only scratched the surface of society's need for digital forensic tools", says CEO Joel Bollö.

### MSAB in brief

MSAB is a world leader in mobile forensics technology with the aim of extracting and analysing data from confiscated mobile devices, mainly mobile phones. The company has its own sales offices and sales representatives in Europe, North America, South America, China, Australia, Singapore, Japan and Russia, and together with a number of distributors covers most of the world. The company's proprietary products have become a de facto standard in the field and are used for securing evidence in over 100 countries. The products are complemented by a wide range of training courses, with the opportunity to become certified in a forensically sound method of extracting data from mobile devices. Customers are primarily authorities involved in performing criminal investigations, and include police, military and customs. MSAB is listed on NASDAQ Stockholm under the ticker symbol: MSAB B.
