## MSAB receives an order of SEK 17 million from a new northern European customer

MSAB, a world leader in mobile forensics, receives an order of just over SEK 17 million from a new northern European customer. "We are proud that this customer chose MSAB as a supplier. It is the first customer that specifically focuses on strengthening its possession of forensic technology for the benefit of witnesses and crime victims," says Joel Bollö, CEO of MSAB.

The sale refers to the extraction software MSAB Extract - XRY Office and MSAB Frontline, which contains both software and hardware for decentralized reading, analysis, and methods for handling digital evidence in mobile phones, locally or directly at the crime scene. Furthermore, the delivery, which consists of nearly 100 units, has been developed to strengthen the legal security of witnesses and crime victims. Deliveries will begin in March 2023.

"We received the order thanks to the further development we have carried out around unique functions in our products and services and there are several authorities in many countries that have the same needs. The order confirms that our products are among the best in the world and also exceed the quality requirements," says Joel Bollö.

### *About MSAB:*

*MSAB is a world leader in forensic technology for extracting and analyzing data in seized mobile devices. The company develops high-quality and easy-to-use software for law enforcement organizations, such as police, defense, and customs. The products, which have become a de facto standard for securing evidence in criminal investigations, can be supplemented with reporting tools and a large range of training with certifications within a holistic method for forensic science. The company serves customers in more than 100 countries worldwide, through its own sales offices and through distributors. MSAB is listed on Nasdaq Stockholm under the ticker name: MSAB B.
