Digital Investigations Meet Remarkable Innovation in MSAB's Latest Major Release

MSAB (Micro Systemation AB, publ), a global leader in digital forensics, is proud to announce the highly anticipated third major release of the year, showcasing significant updates and new features across its flagship products: XRY, XAMN, and XEC. “This release solidifies MSAB's commitment to providing cutting-edge solutions to law enforcement agencies, digital investigators, and forensic experts worldwide”. says Peter Heuman newly appointed CEO at MSAB, “We have a rich history of innovation, and that tradition continues with this major release”.

“Our vision is clear: empower every investigation with digital forensic solutions – for a safer world. We do this by continue to advance digital forensics technology and supporting the vital work of law enforcement agencies worldwide,” says Peter Heuman. “The latest release of XRY, XAMN, and XEC is just the beginning of what we have in store.”

Key highlights of the latest major release from MSAB:

- **XRY 10.7:** The latest version of XRY brings a host of new features and improvements, enhancing the efficiency of mobile data extraction and decoding. Notable additions include support for iOS 17 and Android 14 and the ability to extract OCR and content recognition from Apple Photos. Significant enhancements have been made to Full File System Extractions by adding support for selective app extractions.
- **XAMN 7.7:** The powerful data analysis and visualization tool has also been subject to significant upgrades. This version introduces an import function for the popular Berla iVe format, allowing forensic practitioners to easily run cases involving vehicle and mobile data within XAMN. Map and geographic data have seen a complete overhaul, with simplified artefact presentation, more flexible areas of interest, and the possibility to store offline maps in a central location. The Report builder has been improved upon further.
- **XEC 7.7:** MSAB's evidence management platform continues to evolve with the release. This version allows users to manage clients running XRY Pro directly for XEC Director. Audit functionality has seen an 800% increase in the number of XAMN actions logged.

“Our customers are at the heart of everything we do. We understand the challenges they face, and our goal is to make their jobs easier,” says Bradley Sipes, Chief Product Officer at MSAB. “With XRY 10.7, XAMN 7.7, and XEC 7.7 we are not just providing software updates; we are delivering solutions that actively improve the workflows and productivity of law enforcement professionals.”

The MSAB toolkit provides secure end-to-end mobile forensics solutions that help agencies and organizations worldwide with solving cases ranging from criminal activity to exposing fraud.

“The improvements we brought to our products are multifaceted,” added Bradley Sipes. “You can select from which specific apps to extract data for Full File System extractions; it’s easier than ever to analyze machine and handwritten text in pictures; and when you run investigations involving geographic artefacts, you’ll be very happy with how straightforward it is to do it in XAMN.”
