MSAB Receives Investment from Federal Agency in North America

MSAB (Micro Systemation AB, publ), a global leader in digital forensics, secures an order worth over 17 million Swedish Kronor from a federal agency in North America. "This is our second major order in the fourth quarter from the North American market," says Mike Dickinson, Senior Vice President Sales at MSAB.

The sale involves the renewal of licenses for both the extraction and analysis software XRY and XAMN, as well as other peripheral equipment, totaling over 17 million Swedish Kronor. The federal agency procures MSAB's products to consistently achieve access to data on mobile devices. Software support is also included in the agreement, which runs for one year. The revenue is expected to be reported in the company's fourth quarter.

About MSAB:

MSAB is a world leader in forensic technology for extracting and analyzing data in seized mobile devices. The company develops high-quality and easy-to-use software for law enforcement organizations, such as police, defense, and customs. The products, which have become a de facto standard for securing evidence in criminal investigations, can be supplemented with reporting tools and a large range of training with certifications within a holistic method for forensic science. The company serves customers in more than 100 countries worldwide, through its own sales offices and through distributors. MSAB is listed on Nasdaq Stockholm under the ticker name: MSAB B. www.msab.com
