

MSAB Secures Major Contract with U.S. Government Agency

MSAB (Micro Systemation AB, publ), a global leader in digital forensics technology, has signed a substantial agreement valued at SEK 18.5 million with a United States Government Agency.

The contract encompasses the renewal of software licenses for XRY and XAMN, MSAB's industry-leading solutions for mobile device data extraction and analysis. The agreement also includes comprehensive software support and is valid for a period of one year.

"We are honored by the continued trust and confidence shown in our technology by such a valued partner in the Americas region," said Peter Gille, CEO at MSAB. "We remain fully committed to supporting our customers in achieving their mission-critical objectives both now and in the future."

The U.S. agency utilizes MSAB's solutions to reliably and efficiently access data from mobile devices, reinforcing its operational capabilities. Revenue from this agreement is expected to be recognized in the company's third quarter.

About MSAB:

MSAB is a world leader in forensic technology for extracting and analyzing data in mobile devices. The company develops high-quality and easy-to-use software for law enforcement organizations, such as police, defense, and customs. The products, which have become a de facto standard for securing evidence in criminal investigations, can be supplemented with reporting tools and a large range of training with certifications within a holistic method for forensic science. The company serves customers in more than 100 countries worldwide, through its own sales offices and through distributors. MSAB is listed on Nasdaq Stockholm under the ticker name: MSAB B. www.msab.com
